

First, ensure that your Kaptivo is setup and connected to your network. (Read Kaptivo quickstart guide to Setup your Kaptivo properly)

Second, power up and connect the KaptivoCast to an HDMI input device (e.g. a TV monitor) and follow the on-screen instructions to connect the Cast to a Kaptivo directly or through the network. For network-connected KaptivoCasts:-

**Step 1:** a) Go to its setup page by entering the IP address of the Cast. (IP address will be displayed on the monitor to which your Kaptivo cast is connected through HDMI)

	User Name Password  Reserved  SiGN IN		

b) Add the ID and password, both are Admin by default.

**Step 2:** You will see a list of Kaptivos available on the network, you can then link the desired Kaptivo to the Cast. Click on the Link button highlighted in green, beside the ID of your Kaptivo Camera that you need to connect with.
