Introduction

Our Niveo Professional N10GSM-series designed for Audio/Video, Security and Broadcast integrations. Series routing switches, high-performance Layer 3 Ethernet switch with 10G /Multi-Gigabit / 100G QSFP28 Ports compact 1U form factor. The switches provide a powerful Layer 3 routing solution for next generation enterprise, Wi-Fi 6 Access, Metro and HCI (Hyper Converged Infrastructure) networks and High density Video-over-IP solutions.

Supporting Video-Over-IP Solutions: Small to extremely large

Our Niveo Managed N10GSM(E)-Switches are optimized for Video-over-IP, providing multicasting with IPGM Querier and Fast Leave to support very crisp switching of channels. The switches support any mainstream Video-over-IP Solution up to 20Gbps:

Ultra-Long-Distance PoE++

The N10GSM24XP supports PoE++, with a reach up to 300m. Compatible 802.3af/at/bt standard.

System Design for Green and Energy Saving

Intelligent FAN adjustment and real-time power consumption monitoring technology are provided for the cost of maintenance reduction and to help build green and energy saving networks, whilst keeping fan noise to a minimum.

Advanced Features

The N10GSM-Series routing switches supports leading edge Data Center features: like Priority Flow Control (PFC), explicit Congestion Notification (ECN) and Data Center TCP. The MLAG feature (Multi-Chassis Link Aggregation) enables streams over 10Gbps and allows for true uncompressed 4K60 4.4.4 streams. Or can be used to facilitate multi-switch Video-over-IP designs for 400+ 10Gbps streams in a single design or 2000+ 1 Gbps endpoints in a setup.

Ultimate Installer Support

All Niveo Switches include lifetime access to software updates and support, without any additional costs for care packs. Niveo Switches come full installer support, making network design and configuration a breeze.

Our support team is proud to assist integrators with:
- Network design and best practices
- Configuration file creation and assistance
- Trouble shooting
