Value Added Distributor

Authorised Distributors of:

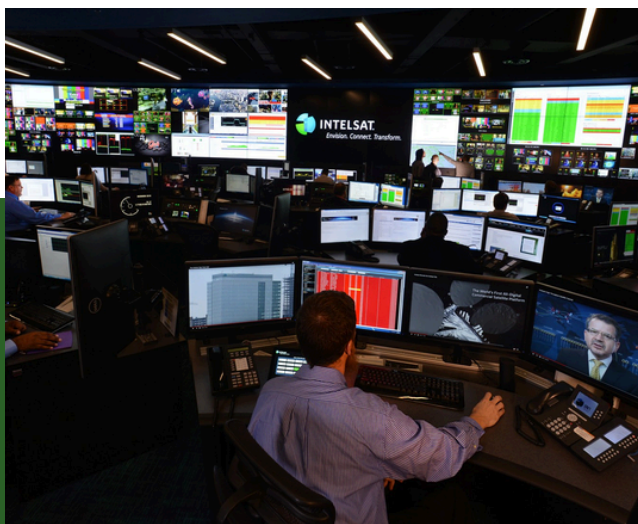

About Us

Authorised Distributor of Leading Global AV Brands

QTech Distribution is the authorised distributor for globally renowned AV brands, delivering innovative, high-value technology solutions. Many of the brands we introduced early have since scaled into multi-million-dollar successes, reflecting our ability to identify and grow market leaders. Our customers benefit from authenticity, reliability, and long-term service assurance.

Wide Network of Partners

Through our wide network of channel partners across, we aim to provide sustained and stable products with a focus on service and technical support to the brands we represent.

100% Genuine, Authentic

As an authorised distributor, QTech guarantees genuine products with direct OEM warranties. Every solution is procured through legal, transparent channels, with invoicing, duties, and clearances completed.

Epiphan

Epiphan delivers hardware and cloud-based solutions for video capture, streaming, recording, and live production. Their intuitive and reliable products empower organizations to create, manage, and share high-quality video effortlessly across education, healthcare, enterprise, legal, and live event environments.

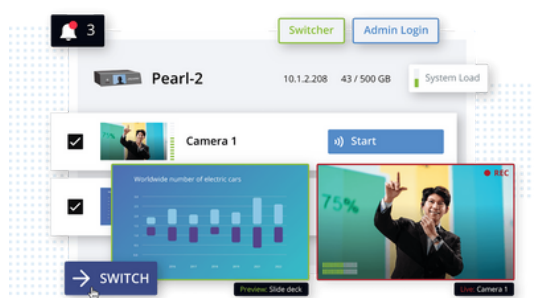

All-In-One Video Production Systems

They combine switching, streaming, recording, and layout customization into a single device, making them perfect for professional broadcasts, hybrid events, corporate communication, and education.

Rugged Capture Cards

They are built tough for professionals on the go. Compact, plug-and-play, and highly durable, they provide seamless capture of HDMI™, SDI, and DVI sources into your computer with zero drivers required.

Epiphan Cloud

Epiphan's Cloud and centralized management platforms give organizations the ability to monitor, control, and manage multiple Epiphan devices remotely.

Free Lifetime Updates

Regularly receive firmware updates that deliver new features, enhanced performance, and security improvements.

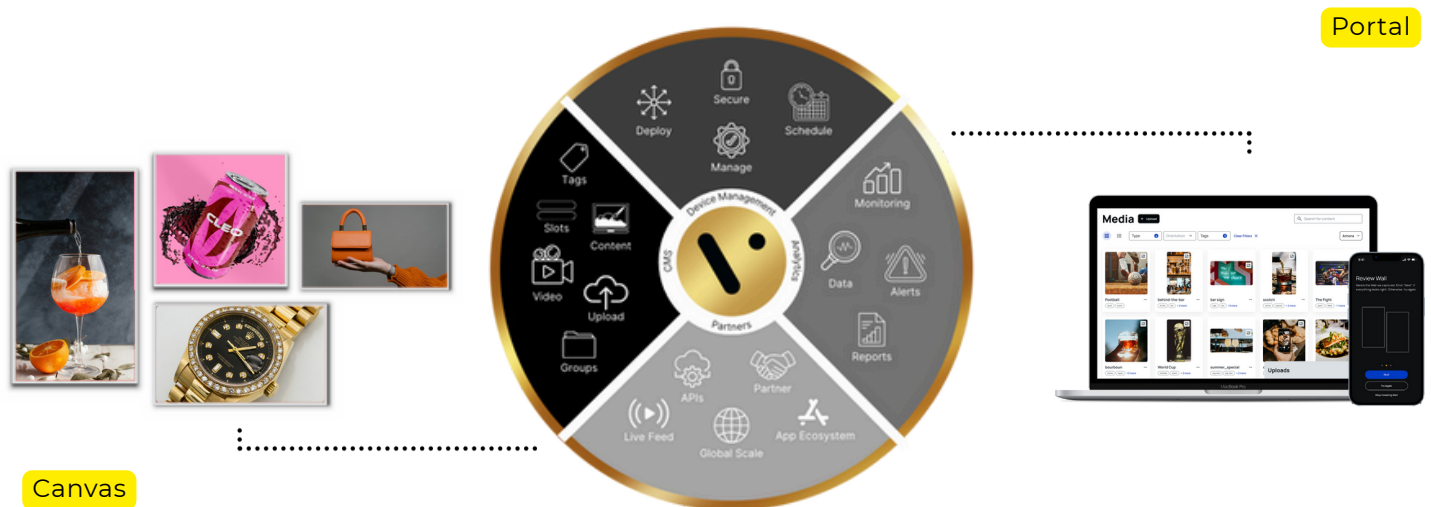

Trusted By

Legendary for its powerful and reliable touring-class sound reinforcement, Crest Audio is a global leader in designing power amplifiers and mixing consoles for live, commercial, and networked audio.

Since the late 1970s, Crest has advanced live sound through bulletproof engineering. Its low-noise, high-headroom mixers set new industry standards and became indispensable on the touring circuit.

Crest continues its legacy with the Tactus Digital Mixing System, offering all the features of touring-class digital consoles without the bulk or complicated menus. Tactus provides up to 256 channels of high-quality, uncompressed 96kHz audio over a low-latency network, with portable fader controls and Waves LV-1 software integration.

Since 1993, MediaMatrix has transformed the audio industry with scalable, flexible, and high-performance DSP systems. It allows operators to configure and control audio from computers, touchscreens, or mobile devices in the world's most demanding environments.

With its powerful digital signal processors, award-winning nWare™ and Kiosk2Go™ control suites, MediaMatrix delivers advanced audio systems for corporate, stadium, convention, and high-end installations. The 2017 release of nWare 2.0 introduced project templates, expanded device support, and an improved interface, making system configuration, programming, and operation faster and more intuitive than ever.

Hiperwall

Hiperwall offers a software-based video wall platform that leverages AV-over-IP technology to display content from multiple sources across networked displays. Its hardware-agnostic design, scalability, and enterprise-grade reliability empower organizations to visualize critical information, collaborate effectively, and make informed decisions in command centers, enterprise spaces, education, and live events.

Hiperwall

Hiperwall provides a flexible video wall platform for real-time content visualization.

Engage Ops enables small command centers to securely share multiple streams, schedule content, and manage operations easily.

Engage

Engage lets teams share multiple sources wirelessly in meeting and hybrid spaces, making collaboration simple, efficient, and cable-free.

It enhances communication and teamwork without complex setups.

HiperCARE
PREMIUM

HiperCare Premium provides software updates, security enhancements, flexible license management, remote support, and training to ensure your Hiperwall system operates at peak performance, securely and reliably.

Trusted By

RDL

RDL delivers professional-grade audio solutions, including Format A modules, Dante® audio interfaces, and signal distribution, mixing, and control hardware. Their reliable, scalable, and versatile systems enable seamless audio routing, signal conversion, and integration across corporate, education, government, entertainment, healthcare, and live event environments, ensuring clarity, flexibility, and effortless performance in any AV setup.

Audio

Modules for mixing, switching, amplifying, and processing line and microphone signals, delivering clean and reliable audio.

Twisted Pair (Format-A®)

Wall-plate and rack modules that send audio and composite video over a single cable, simplifying installation.

Dante Interfaces

Interfaces connecting microphones, line-level, and Bluetooth® audio to Dante networks, enabling scalable, high-quality digital audio distribution.

Remote Panels & Controls

Decora® and ULTRASTYLE™ wall plates and controls for easy operation and integration with RDL and other systems.

Switching & Control

Solutions for routing and managing audio/video signals with reliable performance.

Accessories

Mounting, power, and installation accessories that improve flexibility and system setup.

Nowsignage

One platform for every industry. Easy to deploy, simple to manage, and proven to drive results, NowSignage delivers a low-cost, enterprise-level digital signage CMS designed to add value across every sector. The platform enables organizations to engage audiences, broadcast urgent updates, and streamline real-time messaging across retail, corporate, education, healthcare, and more.

Everything you need to power your screens

Easy to Use

Drag-and-drop content, update screens in minutes.

Secure & Reliable

Enterprise-grade with multi-layer protection.

Affordable & Flexible

All premium features included at no extra cost, no hardware lock-in.

Custom Integrations

Connect seamlessly with Microsoft, Google, social media, BI tools.

Works Across Devices

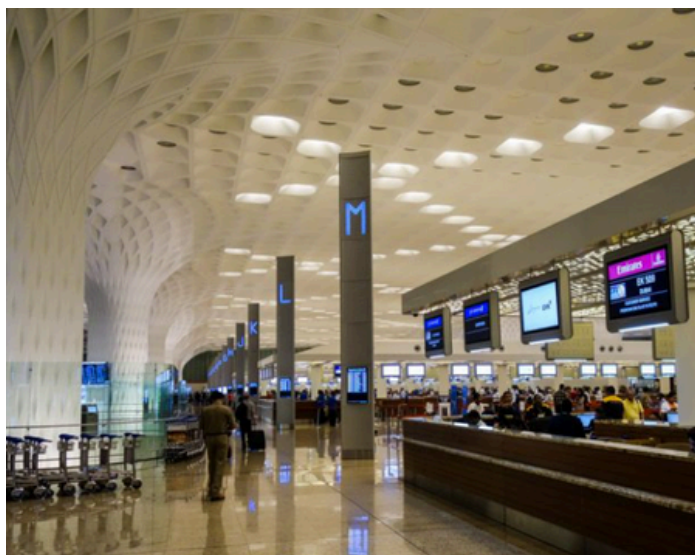

Compatible with Android players, browsers & more.

Superior Support

Free upgrades, video guides, ticketing.

Amino delivers secure, scalable hardware, software, and cloud solutions that simplify video delivery, streaming, and management. Their platforms empower organizations to engage audiences, modernize media workflows, and deliver reliable video experiences across Pay TV, digital signage, enterprise, hospitality, and education sectors.

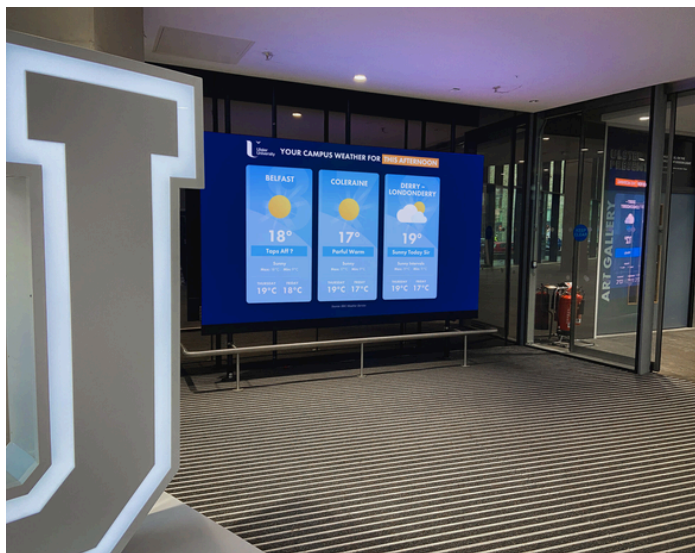

Signage Media Player

High performance 4K UHD enterprise device, optimised to deliver high quality content for 24x7 operation hours to digital signage applications.

IPTV Set top box

4K PoE Rugged Media Player with inbuilt Channel Zapper for IP Streams, can be used as IPTV Set top box as well.

Orchestrate

Cloud platform for easy deployment, remote device management, content updates

Amino SDK

Build custom apps for digital signage and enterprise video on a flexible, developer-friendly platform.

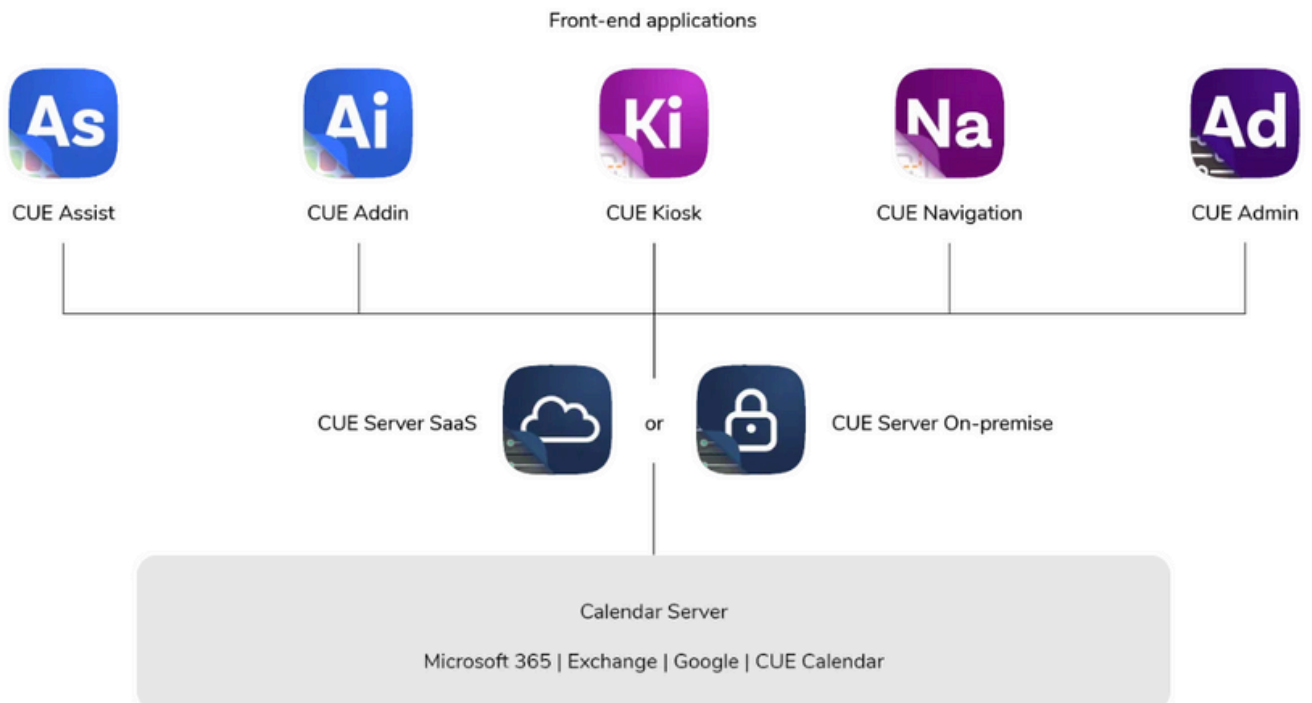

Cue Systems

Cue System provides a unified ecosystem of hardware and software that covers control, reservation, navigation, management, and analytics for meeting rooms, classrooms, and training spaces.

Their tools simplify room control, scheduling, navigation, and system management, delivering seamless, efficient, and smart experiences for users and administrators alike.

BLOCK DIAGRAM

Trusted By

Niveo Professional

Niveo provides powerful networking solutions that make AV-over-IP systems seamless, flexible, and reliable. Their products simplify deployment, optimize performance, and ensure smooth, high-quality distribution of video and audio across networks of any size. Designed for efficiency and scalability, Niveo helps organizations manage complex AV setups with confidence and ease.

Enterprise Line Switches (NGSM Series)

High-performance, AV-ready switches built for large-scale deployments. Deliver reliable AV-over-IP, Dante audio, and PoE connectivity, enabling seamless collaboration, streaming, and mission-critical operations across enterprise environments.

Business Line Switches (NRS Series)

Efficient, easy-to-manage switches designed for SMBs. Support everyday network operations with smooth AV integration and dependable performance for offices, retail, and corporate spaces.

10 Gig Network Switches (N10GSM Series)

High-performance, managed switches designed for environments demanding audio/video (AV), security, broadcast, enterprise, and data center environments.

TeamMate

TeamMate designs and manufactures advanced AV furniture that seamlessly integrates technology into modern learning and working environments. From lecterns and collaboration tables to display stands and technical cabinets, TeamMate solutions combine durability, flexibility, aesthetic, clutter free design to create spaces that inspire teaching, presenting, and teamwork.

Collaboration Furniture

Flexible and ergonomic tables designed to support teamwork and hybrid collaboration.

Screen Stands & Dividers

Stylish, AV-ready stands and partitions that keep spaces cable-free and functional.

Lecterns & Podiums

Modular, customizable teaching desks and podiums built for education and corporate use.

Workspace Tables & Soft Seating

Contemporary desking and seating that blend comfort, design, and practicality.

Kaptivo

Kaptivo transforms standard dry-erase or glass boards into smart, connected surfaces for modern workplaces and learning environments. From real-time whiteboard capture to live sharing and automatic archiving, Kaptivo solutions combine clarity, simplicity, and seamless integration to make collaboration effortless, whether in-person or remote.

Real-Time Capture

The Kaptivo camera captures whiteboard content in real time, removing shadows, reflections, and people in front of the board, delivering clear and crisp images

Live Streaming to VC Platforms

Share whiteboard content directly into Zoom, Microsoft Teams, or other video platforms in real time, keeping remote teams fully engaged during meetings or classes.

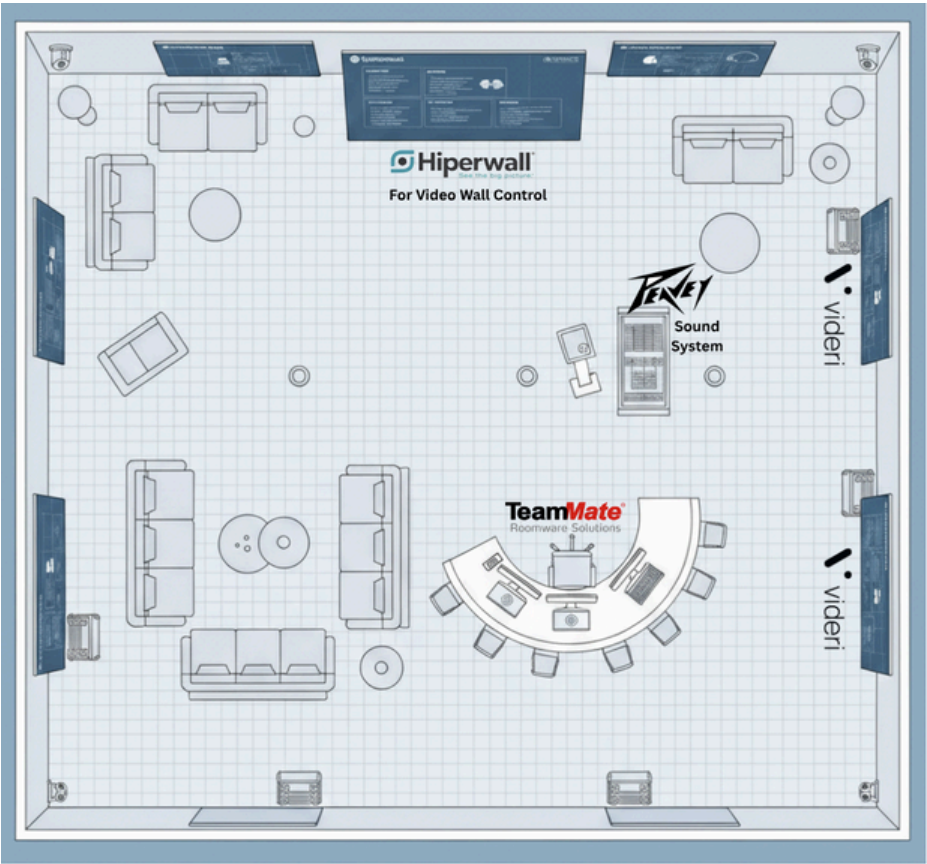

Snapshot & PDF Export

Save sessions as high-quality images or PDFs for easy review, archiving, or sharing with colleagues and students after the meeting.

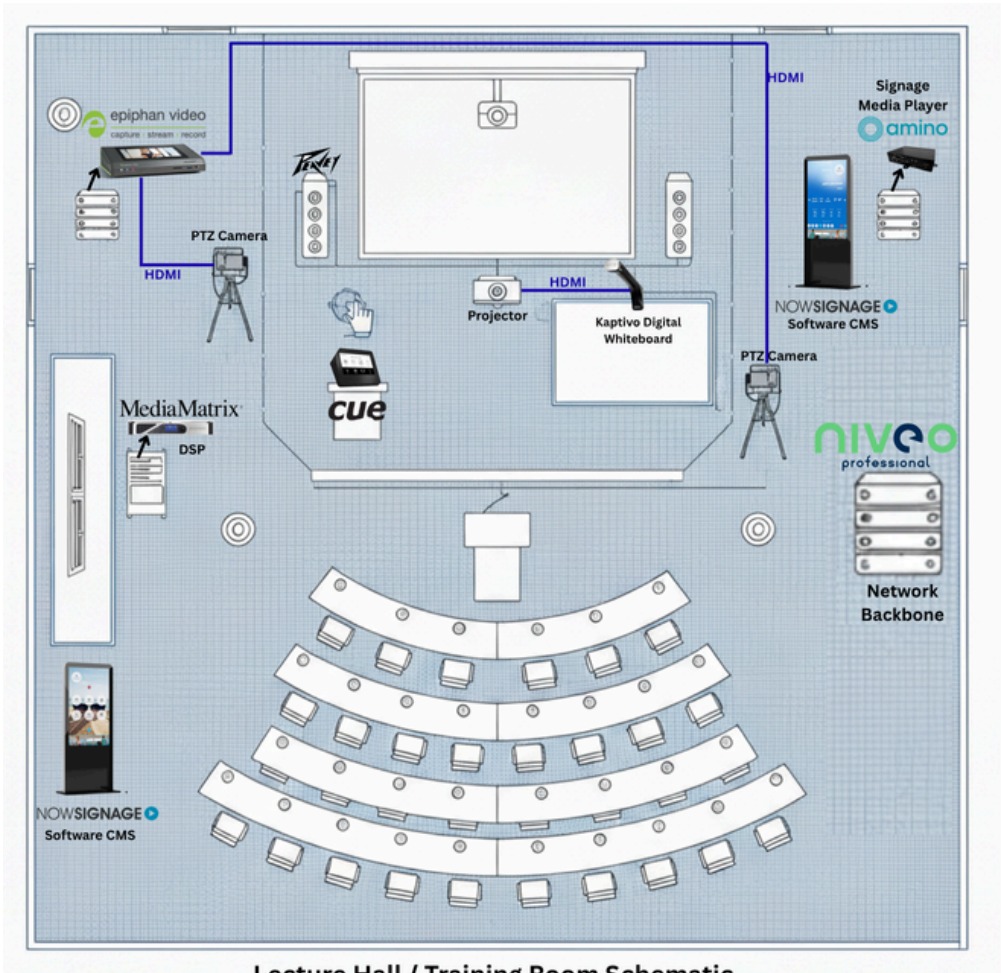

Self-Hosted Mode

Maintain full control over your whiteboard data by hosting it on-premises, ensuring security, privacy, and compliance with organizational policies.
